409A01.C. Minimum Fluctuations

The price of an option shall be quoted in terms of the respective CME European Seasonal Strip CAT Index. Each index point represents 20 British pounds (pounds sterling). For example, a quote of 2 index points represents 40 British pounds (pounds sterling). The minimum fluctuation shall be 1.0 index point (also known as one tick), equal to 20 British pounds (pounds sterling).

409A01.D. [Reserved]

409A01.E. Exercise Prices

Exercise prices shall be stated in terms of the respective CME European Seasonal Strip CAT Index futures contract. Eligible exercise prices shall be at intervals of 1 CME Seasonal Degree Days Index point (e.g., 4510, 4511, 4512, etc.).

At the commencement of options trading in a contract month, the eligible put and call options are at intervals of 1 index point in a range of 1 to 6500 index points for a seasonal Strip CAT upon demand evidenced in the options pit. New options may be listed for trading up to and including the termination of trading.

The Board may modify the provisions governing the establishment of exercise prices as it deems appropriate.

409A01.F. Position Limits

No person shall own or control a combination of options and underlying futures contracts that exceeds 10,000 futures-equivalent contracts net on the same side of the market in all contract months combined.

For the purpose of this rule, the futures equivalent of an option contract is 1 times the previous business day's IOM risk factor for the option series. Also for purposes of this rule, a long call

option, a short put option, and a long underlying futures contract are on the same side of the market; similarly, a short call option, a long put option, and a short underlying futures contract are on the same side of the market.

409A01.G. Accumulation of Positions

For the purposes of this rule, the positions of all accounts directly or indirectly owned or controlled by a person or persons, and the positions of all accounts of a person or persons acting pursuant to an expressed or implied agreement or understanding, and the positions of all accounts in which a person or persons have a proprietary or beneficial interest, shall be cumulated.

409A01.H. Exemptions

The foregoing position limits shall not apply to commercially appropriate risk reducing option positions defined in accordance with Regulation 1.3(z)(1) of the CFTC and meeting the requirements of Rule 543.A. and shall not apply to other option positions exempted pursuant to Rule 543.

409A01.I. Termination of Trading

Options trading shall terminate on the same date and time as the underlying futures contract.

409A01.J. Contract Modifications

If the U.S. government, an agency or duly constituted body thereof issues an order, ruling, directive or law inconsistent with these rules, such order, ruling, directive or law shall be construed to become part of these rules and all open and new options contracts shall be subject to such governmental orders.

In addition to the applicable procedures and requirements of Chapter 7, the following shall apply to the exercise of the CME European Seasonal Strip CAT options.

An option that is in the money and has not been liquidated prior to the termination of trading shall, in the absence of contrary instructions delivered to the Clearing House by 7:00 p.m. Chicago time on the day of expiration by the clearing member representing the option buyer, be exercised automatically.

409A02.B. Assignment

A clearing member to which an exercise notice is assigned shall be notified thereof as soon as practicable after such notice is assigned by the Clearing House, but not later than 45 minutes before the opening of Regular Trading Hours in the underlying futures contract on the following business day.

INTERPRETATIONS & SPECIAL NOTICES RELATING TO CHAPTER 409A

CLARIFICATION OF NON-AGRICULTURAL OPTION SPECULATIVE POSITION LIMIT RULE

(Special Executive Report S-1618, March 31, 1986)

Please note that the non-agricultural option speculative position limit rule, in effect at this time, supersedes the speculative position rule for the underlying futures contract. Therefore, for example, a trader may hold a gross futures position that exceeds the futures position limit rule if that gross position is part of a spread with options, such that the net position across options and futures is less than the applicable limit set in the options rule.
