352B02.I. Price Limits and Trading Halts

The primary futures contract month, as referenced in this rule, shall be determined by the Exchange. The Exchange shall also determine when the primary futures contract month is limit bid or limit offered. There shall be no Daily Price Limits in a contract on its last day of trading.

Reference Price for Exchange Price Limits and Exchange Trading Halts: Daily price limits in futures will be established relative to the contract rounded Reference Price ("P") which shall be determined by the Exchange as follows:

Tier 1 The Reference Price shall be equal to the volume-weighted average price of the Nikkei 225 mini Futures trades executed on the Osaka Securities Exchange ("OSE") from (i) 3:29:30 to 3:30:00 p.m. Tokyo time, or, in the event of an early close of the primary Tokyo securities market, (ii) the last thirty (30) seconds of the primary Tokyo securities market trading day (Reference Interval).

- Tier 2 If no transactions occur during the Reference Interval, the Reference Price shall be the average of the midpoints of each bid/ask spread in the OSE Nikkei 225 mini Futures contract during that thirty (30) second interval; however, bid/ask spread pairs wider than three (3) ticks (30 index points), shall not be included in the calculation to determine the Reference Price.
- Tier 3 If the Reference Price cannot be determined pursuant to Tiers 1 and 2 above, designated Exchange staff shall consider any other information deemed relevant to determine the Reference Price. Alternatives upon which Exchange staff may determine the Reference Price include, but are not limited to, the following: (1) deriving the Reference Price based on the basis relationship to the underlying cash index level; or (2) deriving the Reference Price by repeating Tier 1 or Tier 2 calculations at increasing thirty (30) second increment intervals until data is obtained.

If the Reference Price is not divisible by 10.00 without remainder then the Reference Price shall be rounded down to the closest 10.00 point increment. The Rounded Reference Price ("P") shall be used to determine daily Price Limits.

For a newly listed contract expiration month, there will be an implied Reference Price created by the Exchange for the sole purpose of establishing the Price Limits for the first day of trading.

Exchange Price Limit Levels: Price Limits shall be calculated daily based upon the rounded Reference Price, P, and Offset levels.

There will be three (3) Offset levels used to determine the three daily upward and the three daily downward Price Limits.

The three Offset levels will be:

$$\begin{aligned} 8\% \text{ Offset} &= (8\% \times P) \\ 12\% \text{ Offset} &= (12\% \times P) \\ 16\% \text{ Offset} &= (16\% \times P) \end{aligned}$$

Each resultant Offset value shall be rounded down to the nearest integer multiple of 10 Index points. Each such Offset, so rounded, shall be used in determination of the corresponding Price Limits.

The Daily Price Limits for Yen Denominated Nikkei Stock Average futures shall be calculated as follows:

$$\begin{aligned} 1^{\text{st}} \text{ Price Limits} & \text{ equals } \text{Rounded Reference Price (P)} \pm 8\% \text{ Offset level} \\ 2^{\text{nd}} \text{ Price Limits} & \text{ equals } \text{Rounded Reference Price (P)} \pm 12\% \text{ Offset level} \\ 3^{\text{rd}} \text{ Price Limits} & \text{ equals } \text{Rounded Reference Price (P)} \pm 16\% \text{ Offset level} \end{aligned}$$

If, on any CME Business Day, the OSE Nikkei 225 mini Futures contract is closed for trading, then the Rounded Reference Price used for the calculation of daily Price Limits shall be the most recently calculated Rounded Reference Price.

Downward Price Limits – Limit Offer

When the primary futures contract is limit offered at the 1st downward Price Limit, a 2-minute period shall commence. If the primary futures contract is not limit offered at the end of the 2-minute period, trading will continue with the next applicable downward Price Limit in effect.
