

MiFID Market Data Policy

Version 5.0

September 2024

1. Introduction

This document serves as the **Market Data Policy** for the following EU and UK trading venues and products:

EU Reporting			
MIC	Trading Venue Operator	Trading Venue	Product
BTAM	CME Amsterdam B.V.	BrokerTec Regulated Market	BrokerTec EGBs
RESF	CME Amsterdam B.V.	EBS MTF	RESET Post-Trade Risk Mitigation Services

UK Reporting			
MIC	Trading Venue Operator	Trading Venue	Product
NEXS	NEX SEF Limited	NEX SEF	EBS ON SEF NDF
XEBS	BrokerTec Europe Limited	EBS UK MTF	EBS OFF SEF NDF MTF
REST	NEX SEF Limited	NEX SEF	RESET Post-Trade Risk Mitigation Services

EU and UK trading venues are required to provide real-time **market data** on a **reasonable commercial basis** and ensure non-discriminatory access to that information. Furthermore, trading venues are required to make **market data** available free of charge 15 minutes after publication (**delayed data**). **Market data** in this context can be defined as the data that regulated trading venues in the EU and UK have to make public for the purposes of the pre-trade and post-trade transparency regime set out in MiFIR¹; as supported by relevant secondary regulation.

The purpose of this document is to provide consolidated information on

- The provision of market data, including a price list for both market data fees as well as indirect services to access and utilise market data, and
- The main terms and conditions of the market data licence agreement.

“Customer” should be interpreted as the natural and/or legal person who signs the market data licence agreement with the market data provider and is invoiced for the market data fees.

¹ Regulation (EU) No 600/2014 and the UK onshored version of the same as amended and transposed into the laws of the United Kingdom pursuant to the European Union (Withdrawal) Act 2018 and the European Union (Withdrawal Agreement) Act 2020.

3. Additional Disclosures

3.1 Fee Construction

The above Price List for Market Data Offerings has been constructed based on the following considerations;

- (a) Value of market data
- (b) Time and cost of producing, aggregating, disseminating and building a real-time product i.e., API feed
- (c) Future opportunities presented to the end user regarding data usage

Direct costs incurred by CME relating to the cost of building the API feed used to disseminate the real-time APA market data and hardware. In addition to this, indirect costs cover resource and time allocation to the product. A detailed allocation of costs, per unit of sales, is not possible given the absence of active users.

CME will provide 90-days' notice should the pricing policy change.

3.2 Data Delivery and Format

Data Type	Format	Fees
Pre- & Post-Trade	JSON	As per above

CME will provide a Websocket URL connection with secure key and IP whitelisting to ensure that it is only available to subscribing customers. CME will ensure that there is a secondary URL for back-up purposes. Note that the connection is load balanced dynamically for further redundancy.

To gain access please email: MifidMarketDataRequest@cmegroup.com

3.3 Delayed Data

As noted above, pre- and post-trade data⁴ with a 15-minute delay is also offered to users at no cost.

Display Data is available to access via the CME website:

- For BTAM pre-trade and post-trade display data, NEXS, XEBS, RESF and REST post-trade display data, please refer to: [MarketAxess - APA](#)
- For RESF and REST pre-trade display data, please refer to: <https://osttra.com/services/by-capability/optimize/osttra-reset-curves/>

⁴ Please note that CME Amsterdam B.V., BrokerTec Europe Limited and NEX SEF Limited are authorised to make use of certain MIFID transparency waivers and deferrals. Where these are applied, pre-trade data may be unavailable and post-trade data may be subject to deferred publication.

Data is also available via a commercial feed. Access to the feed is delivered via web sockets in JSON format. Customers and potential customers are not charged any indirect services necessary for accessing market data.

To gain access please email: MifidMarketDataRequest@cmegroup.com

3.4 Indirect Services and Costs

There is no additional charge for any indirect services necessary for accessing the market data offering, such as connectivity fees or software or hardware requirements. The purchase of Market Data is available separately and “unbundled” from any other products or services offered by CME Group.

3.5 Categories of Customer

This Policy, and adjoining Price List for Market Data Offerings, does not differentiate or seek to establish “Categories of Customers”. The same fees and terms and conditions are applied to all customers. Furthermore, the relevant technical arrangements for accessing the data, including latency and connectivity, neither discriminate nor create any unfair advantage by design.

3.6 Discount Policies

There are currently no Discount Policies available.

3.7 Questions
